

Modern Emergency Department Enhances Training at CDP

00:00:00 – 00:02:05

Black Video

00:02:06-00:12;18

Opening Slate

00:12:19-00:26;06

Video of ambulance (with sirens) arriving outside Emergency Department (ED). Medics communicating with each other. ED nurses run to assist with medic explaining symptoms.

00:26:07-00:29;23

Video: ED personnel discussing patient's chart.

00:29:24-00:32;17

Video: Panicked mother walking inside ED with her baby in arms. "Someone is gonna see my baby now."

00:32:18-00:41;29

Video: ED nurses discussing patient tracking monitor. Nurse One "We're keeping it updated so incident command knows what's going on down here." Nurse Two "Would you consider us saturated right now?" Nurse One "We're close."

00:42:00-00:58;26

Video inside ED with natural sound

00:58:27-01:07;26

Candice Gilliland, Senior Healthcare Instructor

"We've expanded the emergency department approximately by three times. So we have a lot more space for the students to utilize for training, as well as for surge capability."

01:07:27-01:21;12

Marston Kimerling, Student, Healthcare Leadership Course

"I was here October of 2010, and it seemed to be really stressful with the facilities. They were cramped and people were running into each other. It was an even more hectic environment than it needed to be."

01:21:13-01:24;29

Video of student answering ED telephone with natural sound

01:25:00-01:42;09

Jerry McCrary, Student, Healthcare Leadership Course

"I think we would run a much better response having been here for this training. I think a lot of the confusion, and a lot of who we should have called, that we didn't, would have eliminated that failure as a result of this training."

01:42:10-01:47;22

Video of ED Physician: "Hey Mark, you want to throw these orders in on two? We have our trauma orders here."

01:47:23-01:54;19

Video of ED nurses at nurses station requesting lab results and asking about the availability of beds for incoming patients.

01:54:20-02:07;02

Robin Kerschner, Student, Healthcare Leadership Course

"The training environment here now is going to give you that real feel of an ER you have back home. You'll be able to go through and look at it and see the different areas you would have in ED you work at."

02:07:03-02:15:09

Video of instructor observing from inside the control room and operating a Human Patient Simulator.

02:15:10-02:22:00

Video of ED nurse responding to a patient simulator, and asking if there is a pulse. Includes other random ED shots.

02:23:01-02:40:13

Candice Gilliland, Senior Healthcare Instructor

“CDP training is focused on mass casualty, mass disaster events. It allows them to come in and try things they may be doing or thinking about doing within an environment where it is not going to harm anyone. It allows them the opportunity to test those options.”

02:41:14-02:46:28

Video of ED personnel working with a patient simulator and discussing vital signs.

02:46:29-03:00:08

Jennifer McBride, Student, Healthcare Leadership Course

“The trauma bay is beautiful with the windows. You can see everything. And the simulation men are state-of-the-art and really cool. It really does provide good training.”

03:00:09-03:08:10

Video of ED Physician: “Lets load her with another 150.”

03:08:11
